ABOUT

Full-stack developer and system analyst with 2+ years of experience in manufacturing environments. И аналитической I design, build, and deploy digital systems end-to-end — from architecture to production. Specialisation: internal tools for manufacturing, replacing Excel spreadsheets and paper-based workflows with working web platforms.

EXPERIENCE

Full-Stack Developer · System Analyst · Astana Motors Manufacturing Kazakhstan

November 2025 — Present · 7 months · Almaty, Kazakhstan

QPM — Quality Production Monitor

Built and deployed a modular production management web platform from scratch. Replaced Google Sheets, AppSheet, and paper-based journals.

- 7 modules: paint quality control, defect tracking, registries, task manager, staff, document management, analytics
- Defect module: registration by production lines, reference books for parts and colours by car model. Analytics and XLSX export
- Registry builder: users define their own table structure, balance tracking with full operation history (income/expense), analytics
- Built-in chat, push notifications, QR scanner, global search across all modules
- Deployment: Railway + PostgreSQL + Backblaze B2. Live: qpm-app.up.railway.app
- **Python, Django 5.2, DRF, PostgreSQL, Vanilla JS, HTML/CSS, Redis, WebSockets**

Paint Coating Quality Monitoring System — Body Paint Shop (5 lines)

- Distributed tablet-based data collection system: 350+ records/day, zero manual aggregation
- Real-time anomaly detection — management alerts within minutes of threshold breach
- Automated shift reports: DPU, DPR, hourly defect distribution, day-over-day trends, model breakdown
- Cross-spreadsheet ETL pipeline with deduplication across 7 sources

Paint Coating Quality Monitoring System — Plastics Shop (2 lines)

- Mobile application for defect registration: parts selection, statuses OK/Repair/Rework, role-based access
- PostgreSQL backend: normalised schema, 10 tables

Deployment & Stakeholders

- Integrated systems into two shop floor workflows, trained operators on tablet-based data entry
- Participate in defect review sessions with engineers and management, propose data-driven solutions

Database Manager · Data Analyst · ACT Kazakhstan

August 2024 — November 2025 · 1 year 4 months · Almaty, Kazakhstan

- Designed and launched 5 online surveys, collected 3,000+ respondents across 6 research projects
- Prepared 15+ analytical reports and client-facing presentations from raw data
- Statistical analysis in IBM SPSS and Excel: segmentation, cross-tabulation, pattern identification
- Managed data collection pipelines including unstructured formats
- Primary client point of contact: requirements gathering, results presentation, on-time report delivery

PERSONAL PROJECTS

QPM — Quality Production Monitor

Modular production management platform. Built as an independent product, deployed at an automotive manufacturing facility in Kazakhstan.

- 7 modules: quality control, defect tracking, registries, task manager, staff, document management, analytics
- Custom registry builder with balance tracking, defect registration by production line, built-in chat, push notifications, QR scanner
- Stack: Python, Django 5.2, DRF, PostgreSQL, Vanilla JS, Railway, Backblaze B2, Redis
- Live: qpm-app.up.railway.app · github.com/Ildar69/qpm-showcase

streakapp.kz — Habit Tracker

From idea to live users in 4 days.

- Telegram bot with automated reminders, Web Push notifications, PWA
- Stack: Django, PostgreSQL, Python, Telegram Bot API, JavaScript
- Live: streakapp.kz · github.com/Ildar69/streak-app

SKILLS

Languages: Python, JavaScript, SQL, HTML/CSS

Frameworks: Django, Django REST Framework, Google Apps Script

Databases: PostgreSQL — schema design, normalisation, indexing

Infrastructure: Railway, Backblaze B2, Redis, WebSockets, Git

Tools: Chart.js, openpyxl, APScheduler, Looker Studio, IBM SPSS, AppSheet

Domain: Manufacturing, quality control, paint coatings, defect analysis, internal automation

EDUCATION

Bachelor's Degree, Information Technology · **Almaty University of Power Engineering and Telecommunications**

2022 — 2024

College Diploma, Information Systems · **Almaty University of Power Engineering and Telecommunications**

2018 — 2022
